

Dear Mr./Dear Ms William Weber (as private and confidential)

Survey Evaluation Results

Dear Professor Weber,

Attached please find your course evaluation results for the course Computers in Education.

Individual course reports are provided as separate reports. An Instructor Profile report is a compilation of individual course reports automatically included in a report request. If only one individual course report was requested, the Instructor Profile report and the Individual Course Report will be identical.

Interpretation of Overall Indicators:

Global Index--Calculated by adding the results of all scaled questions on the evaluation, and dividing by the number of evaluations returned.

Numbered Indicators--Calculated by adding the results of all scaled questions in a question group, and dividing by the number of evaluations returned.

Note: Question group 2 includes only one question "Overall Instructor Rating." The value is the average of the responses to that single question; it is NOT calculated from the values in Question Group 3, "Instructor Evaluation." The values of the two indicators may be similar, but may not be identical.

If you have general questions about the evaluation processing and reporting please contact the following:

Institutional Research Office, facultyeval@msubillings.edu, (406) 247-5750

Thank you,

^{1.2)} Major Department

- EDU
- Education (2 Counts)
- HHP

4. GENERAL COMMENTS

^{4.1)} Comments:

- Professor Weber did a nice job in this course. He was very accessible and approachable. He answered my general online course questions as well as my questions for his course. He was well organized and had interesting ways to show us available technology like having the class take a poll. Overall he did a great job.
- This was an online course. I was bluntly told early in the course if I was unable to keep up I needed to drop the course. I have multiple health and also cognitive issues and was unable to keep up with the requirements. MSUB has not been able to accommodate my illnesses and learning disabilities. I did stop in once to see the professor, but I was told I would need to complete several assignments. Also, the professor stated that at any time he could change any assignment from an individual assignment to a group assignment which I found out too late. With late diagnosed attention deficit disorder together with severe degenerative arthritis, fibromyalgia and a deficient immune system, it takes me longer than the norm to first of all understand some assignments and then it takes additional time for me to complete the assignments and this is a course I believe should be offered in the classroom for non-traditional students who are learning today's fast-paced software programs such as blogging, social networking and so forth together with the required hardware such as webcams and the multitudes of computer types available. I know that Mr. Webber is quite knowledgeable about the material and perhaps he could have some teaching assistants who could teach a classroom version of this course for those of us who are not as savvy with the computer equipment and software's. I really want and need to learn the material offered in this course but I cannot learn it at the pace offered by Mr. Webber.
- Very fun and interesting class! Learned many new things!
