Question 6

Many instructors have indicated that written comments help them better understand the Part I evaluations and that they frequently contain helpful and constructive recommendations. Please take the time and effort to:

- Explain or elaborate on your responses to the previous items.
- Describe what you liked best about the instructor and the course.
- Suggest ways in which the course/and or the instructor's teaching can be improved.

[Collapse Responses](#)

- ▶ I noticed throughout most of the course that some of the assignments and written instructions handed out had words spelled incorrectly. Running spell check before distributing information would greatly increase my confidence in your abilities... Other than that, I had no problems with the rest of the course. You seemed to have a good idea of what you wanted completed and related it back to the classroom and its importance!
- ▶ I learned a lot in this class and did things that I know I would have never done if not for this class. Whenever I had questions, he got back to me very quickly, which was nice.
- ▶ The course was pretty insightful - pretty easy to navigate
- ▶ Mr. Weber always answered questions, provided thought provoking discussions, and found ways to help with assignments or get assignments turned in for his grading in a timely manner.
- ▶ I found that the course did help me understand technology in education, however I would have preferred to more interaction with classmates with ideas on how to incorporate what we learned into the classroom. I know the topic is huge and meeting for a class might have helped me focus on how to incorporate the various projects into a classroom.

- ▶ I liked very much the fact that I could get in touch with my instructor whenever I had a difficulty. Sometimes the requirements for a Unit were not easy for me to understand, specially at the beginning of the course.
- ▶ Very interesting class with relevant assignments.
- ▶ In my opinion, spelling and grammatical errors look unprofessional; I would recommend spell check. Nothing major.
- ▶ Have thoroughly enjoyed the class even though it has pushed me far outside of my comfort zone. I had so many learning curves to get over...but the learning has been awesome, beneficial, relevant and timely.
- ▶ Bill seem to understand that students are not all equal in terms of technology. He helps those who are technical impaired!
- ▶ The hands on projects were the most beneficial i.e. Google sites and making the video.
- ▶ I liked that everything in this course was very releavant for me. I could use mostly everything I have learned in my classroom some day.
- ▶ The only thing that I would suggest is a change in the discussion topics. It is kind of difficult to discuss things when everyone has the same opinion. The first discussion about laptops to countries around the world was fun and I learned a lot.
- ▶ I enjoyed the projects in the course as they interested me enough to go and do additional research and learning.

I am not a big fan of online group projects. Although I did well and received a good grade on it, the amount of time in initial communication just to get the project started was very frustrating. I would recommend dropping the group project altogether. Bill was readily accessible and gave good insight and feedback.

- ▶ The only item I would put up for consideration is for the class to be live rather than online. For me, I do not know much about computers and feel I need more one on one assistance.
- ▶ I thought the layout of the class was easy to follow. I have had some on-line teachers who are very unorganized with their information on-line, but this was not the case for this class.
- ▶ I enjoyed this course I just wish there was some in class instruction on using technology such as smart boards, Elmo etc.
- ▶ Some of the content gave me excellent ideas for my future as a teacher. However some of the materials and assignments I felt were off topic and didn't make a whole lot of sense for practical usage in the classroom. All in all much of what we learned is useful and can have good application in the classroom.
- ▶ I would have liked to have this class have some in class or in computer lab meetings. I know some of the other, older students, have had some struggles with hardware issues. I would have loved to see smart boards or the like implemented into the course as well. But overall it made me think, got me experienced with some new software, and helped me craft some possible lesson plans implementing technology in the classroom.
- ▶ I think that the course work was a good exercize and was very beneficial to me. I didn't get much out of the book. I would suggest not requiring a textbook.
- ▶ I really liked Bill's encouragement throughout the course. If he was looking for something different in the assignment he would guide you very professionally.
- ▶ Thanks Bill, you were very helpful to me. While I don't especially care for online classes on a personal level and a conceptional one, I think you did a great job doing this course. I learned a lot of helpful things pertaining to what I may have to integrate into a classroom.

Again, Thanks a lot for everything!
Kael

- ▶ After helping struggling classmates finish their homework and assignments, i can see that online is not a very good way to LEARN at all, even if it is a computer class. Some of us can do these things without a problem, but others need actual INSTRUCTION to learn, not just INSTRUCTIONS.
